# ANNUAL REPORT

OF THE

## Board of Managers

# Montana Soldiers' Home

---

Columbia Falls, Montana, December 1, 1904.

Hon. Joseph K. Toole,  
Governor of Montana.

Sir:—

The Board of Managers of the Montana Soldiers' Home has the honor to submit the annual report for the year ending November 30th, 1904.

December 1, 1903, the number of inmates was 79, of whom 59 were present and 20 absent; since then 24 have been admitted, making a total of 103; of these 7 have died and 15 been discharged, leaving a membership at this time of 81, of whom 60 are present and 21 absent on furlough.

After advertising five times for bids for the erection of the building for the accommodation of wives of inmates, as provided for by act of the Eighth Legislative Assembly, two bids were received, one for the erection and completion of the building according to the plans and specifications for the sum of \$6,235.00, the other for the erection and completion of the building and including the heating plant for the sum of \$5,250.00; even the lower bid being greatly in excess of the amount appropriated. After consulting with the State Board of Examiners as to the advisability of using some other funds on hand, rather than to use what was provided and ask for an additional appropriation to complete it, all were agreed that the best interests of the Home and the State would be conserved by accepting the lower bid and letting the contract for the building completed in every particular, including the heating plant, and after the appropria-

tion was exhausted pay the balance out of other funds. This was accordingly done and the contract awarded to Mr. J. E. Moody, of Missoula, in the sum of \$5,250.00. He was afterwards allowed the further sum of \$15.00 for bins and shelving in pantry, not in plans. It is our pleasure to state that the building was completed to the entire satisfaction of the Board, and is regarded as the best, thought not the largest, at the Home, and the contractor is deserving the highest praise. It is built of brick, with hollow walls, is two stories in height, has ten rooms with large clothes closets in each, a commodious dining room, a large and convenient kitchen and pantry, wide halls, easy stairways, up to date lavatories on each floor connected with the sewer system of the other buildings, a first class hot air furnace, and well fitted up laundry room in the basement, also a store room and ample room for fuel. The building completed, it was furnished throughout in such manner as to give comfort and pleasure to the inmates and is ready for occupancy. It will accommodate nine inmates with their wives and leave one room for cook or matron, giving to each the privacy and conveniences to be obtained in our best hotels. Montana has thus far nobly discharged her duty to the veterans of the Mexican, Civil and Spanish-American wars. No applications have yet been received for admission, but it is expected that when it is known that such excellent accommodations have been provided it will be rapidly filled.

The appropriation for a hospital building, some years ago, proved inadequate, and to economize as much as possibly only so much cellar room as would accommodate the furnace was excavated, and it was found necessary to complete the excavation and wall up the rest of the space under the building and move the furnace to near the northeast corner in order to properly heat the hospital; also to add a dining room, which was dispensed with when it was built. This is a material improvement and cost about \$600.00, and is embraced in the item of repairs. The health of the inmates has been good considering their age and condition, but every year the number able to do any work about the place becomes less, more require hospital treatment and more help will be necessary to nurse and care for them. The number of employes indispensable, require considerable

room to properly house them, and this has been done for the past few years in the second story of the hospital, but as that is now required for inmates, they have been temporarily placed in some of the back upper story rooms of the new building, until they shall be needed, in which case it will be necessary to either erect a building for their use or to build a larger hospital and set apart the present one for the use of employes. The latter plan is the one recommended by the Board, as a larger and more modern hospital daily becomes more necessary. The increasing number of hospital inmates imposes greater labor on the surgeon and it has become imperative to increase his compensation for the next year. The Home is exceedingly fortunate in its efficient executive officer and his staff of assistants, all of whom discharge their duties in a manner gratifying to the Board.

The past year has been exceptionally dry, and for the first time within the knowledge of the inhabitants of Flathead County the crops were nearly a failure, and the products of the garden and farm were small in comparison with previous years.

We raised but 140 bushels of wheat, 180 bushels of oats, 15 tons of hay, 20,000 pounds of potatoes and probably sufficient quantity of other vegetables to suffice during the winter, besides those consumed during the season, yet this is better than the average of the farms in that vicinity. Our orchard produced no fruit, though under normal conditions it should nearly supply the home.

The Home has three horses, three wagons, one mowing machine, plows, disc harrows and other farming tools; seven cows, four hogs, a large number of chickens and turkeys and during the past year has supplied 1,132 pounds of beef and 1,367 pounds of pork for consumption by the inmates. The garden and farming land has all been plowed this fall ready for seeding in the spring time. The fences and buildings are in good repair though the main building will need painting next year. All buildings and contents are properly insured.

The receipts and expenditures for the year are as follows:

|   |                    |
|---|--------------------|
| Balance on hand Dec. 1, 1903 .....              | \$3,857.60         |
